

The Touchplan Way

Lean Construction Made Approachable

Touchplan's simple interface has the look and feel of Sticky Notes which reduces the learning curve and allows users to easily manage tasks and access projects anywhere, anytime. The Touchplan Way balances an established dedication to Last Planner® System principles with a firm-wide commitment to making Lean approachable for all stakeholders and team members regardless of where they are at in their Lean journey.

How Touchplan makes Lean Construction approachable:

Ease of Use

- **No** knowledge of textbook terminology needed - teams can implement Touchplan wherever they're at in their Lean journey
- Onboarding/coaching on lean best practices included for every user
- Easiest way to capture stakeholder engagement
- Ongoing support to ensure lean principles are reinforced
- Get customer support in 30 seconds or less
- Touchplan Mobile allows updates to be made from your mobile device anywhere, anytime

Planning & Daily Recovery

- Supports multiple collaborative planning methods
- Empowers teams to commit to an outcome, not to implementing the solution
- Pins mean real commitments, so plans are firmly rooted in reality
- Allows you to complete the full pull planning process without manually putting stickies on a wall
- Gives you the ability to convert your pull plan into your look ahead schedule
- Allows the entire team to complete all steps in the planning process past the master schedule in one place
- Easily identify constraints to better manage roadblocks

Collaboration

- Promotes empowering the doers
- Invites all team-members into the planning environment by providing access to unlimited users
- Collaborative pull planning with weekly work planning allows users to continuously update plans, remain on schedule, and document detailed variance reasons when they hit roadblocks
- Teams can track who is doing what and how it is getting done in a clear member performance view - this enhances communication and promotes effective collaboration
- From trades, to the owner, get buy-in and engagement from all stakeholders

Project Data & Analytics

- Digital process provides robust analytics that is missed with manual planning
- Get data-driven insights with constant updates on how teams can improve for the future, keep everyone informed automatically, and improve project efficiency
- Fosters optimal alignment, collaboration and communication with owners and their vision
- Ensures lessons learned on a project improves future processes - improving project certainty overall

The Touchplan Way allows teams to spend more time delivering the outcome, not on implementing the solution.
